

**KICK
OUT**

**Kick
Out**

With the culmination of three musical forces coming together to forge one new sound, "Kick It Out", the latest release from platinum selling recording artists Boom Boom Satellites featuring Tahj Mowry and Flo-Rida has already begun to infiltrate radio airwaves. With what many program directors have begun referring to as rock-hop, "Kick It Out" is a refreshing sound and great departure from the norm, with a union uncharacteristic in music being played on radio today.

For its fans, "Kick It Out" is an experiment in creativity, ushering in new energy that's both fresh and timeless. No longer moving with the masses, but instead, kicking out a unique sense of individuality and self-expression that's not forced but rather natural. Carving out a new niche in music with its intense guitar riffs and gritty urban edge "Kick It Out" has people dancing again.

"Kick It Out" the movement is in full swing and is ready for you to join in. Log on to www.kickitout.us for more information about Boom Boom Satellites and their new single "Kick It Out".
